Subject: Set-Up of a Temporary Compensatory School Yard

Dear neighbours,

As you know, in our district, the student population is increasing quickly. In order to accommodate them at the Judith-Jasmin school, we have had to put up two modular classrooms on our school grounds. The purpose of this decision by the *CSDM*'s board of school trustees consists in making sure that our youngsters can attend a school in their district, which will keep several of them from having to travel.

To compensate for the loss of space caused by the modular classrooms, we have also had to set up a playground yard in front of the school, on the Mariette Avenue side. We hereby insist on reassuring you that this measure is temporary and solely intends to offer our students a suitable recess space. When the modular classrooms get dismantled, the *Commission scolaire de Montréal* shall retrofit the school grounds' front area into a green space.

Rest assured, dear neighbours, that all our actions are meant for leading the district's children to attainment and success in a stimulating, enriching learning environment.

We thank you for your collaboration and understanding in this large-scale project for our school. In case of any questions, please feel free to contact us.
